## Tennessee Williams

### 'The Glass Menagerie' Opens Tonight; Second Presentation This Season

"The Glass Menagerie" opens tonight at the SIU Playhouse at 8 p.m. (daylight time). This is the second in a series of five productions being presented this summer on the Carbondale campus by the Southern Playhouse.

"The Glass Menagerie," Tennessee Williams' prize-winning drama, is directed by Dr. Christian Moe, associate director of theater. The play will run for five nights, July 8-12.

The cast includes such dramatic veterans as Becky Burroughs, Cosmo Ingers, Jo Conrad and Jack Fitzgerald.

**Play Amanda**

Miss Burroughs, a senior and theater major at Southern, will lead the cast in the role of Amanda Wingfield. Miss Burroughs has to her credit previous roles in "Lady In The Dark," "Picnic," and "Major Barbara." During the summer of 1957, she was a member of the Hiram College (Ohio) show boat company. A member of the National Collegiate Players, Miss Burroughs is from Shawneetown.

Cosmo Ingers will appear in the role of Tom. Ingers, a graduate student in theater, is completing his master's thesis this summer.

He graduated from the State Teacher's College at California, Penn., where he appeared in "June and The Paycock," "Two Blind Mice," "Our Town," and "Pygmalion." During the past season he has had roles in the Southern Playhouse's productions of "Harvey," "Major Barbara," "Macbeth," and "Charley's Aunt."

Laura will be played by Jo Conrad, a senior speech major in oral interpretation. Mrs. Conrad, a resident of Carbondale, has appeared in "Oedipus Rex."

**Valium Of Sit**

Jack Fitzgerald, a transfer student from the Pasadena Playhouse will portray The Gentleman Caller. Fitzgerald has appeared in "Ah, Wilderness," "Macbeth," "Agamemnon," "Once In A Lifetime," "Seventeenth Summer," and "Jenny Kissed Me."

Tennessee Williams, whose official name is Thomas Lanier Williams, was awarded the New York Drama Critics' Prize in 1945 for "The Glass Menagerie." His idea for the play originated when his sister kept a collection of glass animals, but it was not until years later that he wrote his prize-winning drama.

Williams is also noted for his dramatic creations of "Streetcar Named Desire" which won him a Pulitzer Prize for drama in 1946, and "Summer and Smoke."

"The Glass Menagerie," similar to most of Williams' theater productions, is a penetrating study of frustration, written with a touch of dramatic effectiveness.

The Southern Playhouse presented the final performance of Noel Coward's "Private Lives" last Sunday evening. This was their first presentation for the summer season. Coward's play, a sophisticated comedy, was directed by Dr. Sherwin Abrams, associate director of theater.

### Defeats Bill To Provide Engineering

In the Illinois senate last week, the long-sought bill to lift the ban on engineering degrees from SIU was defeated.

With 30 votes necessary for passage, 23 Senators voted in favor of the bill and 17 voted against it. Eighteen members were not present for the voting, and the 23 votes were not a Senate majority.

Backers of the bill blamed a short filibuster which arose on another bill Tuesday night for the failure. They said they had enough votes pledged for passage.

Speaking for the bill were Senators William Grindle, Herin Denton, and R. G. Crisner, Republican from Murphysboro.

SIU Vice-president Charles D. Tenney said University officials feel the issue will be re-opened again in the Commission on Higher Education, or in future legislative sessions.

Tenney said the Senate vote represented "a high degree of support for our views."

### 52 Enrolled In Institute

Fifty-two students from 16 states who were chosen from over 300 applicants, are currently participating in a Summer Institute for Biology Teachers at SIU.

Southern, in cooperation with the National Science Foundation is conducting the eight-week program to high school teachers who have been actively teaching biology. The Institute began June 22 and will run through August 14.

Each participant is receiving a maximum of \$75 per week, \$15 per week for each of the first four dependents, and a travel allowance.

All of the 52 students enrolled in the institute are living in Brown Hall at Thompson Point.

"We feel it is a very important part of the institute for the students to live and eat together," said Dr. Isaac L. Scheemister, co-director of the project.

Dr. Scheemister said living and eating together will offer the students a free exchange of ideas involving the institute.

Objectives of the institute are to offer teachers an opportunity to increase knowledge in subject matter, which would lead to an increase in the number of teachers competent in the basic information of biology.

In addition, it is hoped that contact with distinguished scientists and teachers on the campus will expand the scientific outlook and prestige of the high-school teacher taking part in the program, Dr. Scheemister said.

Credit in the courses which are being offered is applicable toward the Master of Science, Master of Arts, or Master of Science in Education degrees, but it is not necessary for students to work toward a higher degree.

WSKY-FM is Southern's student-operated radio station. The studio is located south of the Cafeteria.

**HIGH THERE!**

Ever wonder what it would be like to not have to stand on your toes in a crowd? Ask Randall Lowry, above, who should know. Lowry stands at a neat six-foot-ten. He seems to tower over the fellow next

### Randall Lowry

### Almost Seven Feet High; Too Tall For Military

By Lois Irwin

Six-foot-ten - tall Randall Ray Lowry is the tallest student on campus this summer.

Lowry, who is attending SIU summer session to work on his master's degree in education administration, is principal and seventh and eighth grade teacher of a rural elementary consolidated school in Hardin County, outside of Cave-In-Rock.

He is a native of that area, and is now teaching in the school he attended as a boy.

Lowry first came to Southern in the fall of 1948 on a basketball scholarship. But during the first part of the season he suffered a back injury and had to give up basketball.

He began his teaching career in the fall of 1950, after his second year at SIU, but continued to work toward a degree through extension courses and summer school.

Last summer, Lowry graduated with a Bachelor of Science Degree in education.

**Difficulty With Younger Ones**

The tall graduate student smiles warmly as he explains that the only difficulty he ever encountered in teaching school was when he taught children in the first or second grades—they thought he was a monster.

"For the first six weeks of school all I would have to do would start to cry," he recounts good-naturedly.

One such episode occurred when he was teaching a third grade class. One little girl in the class never said a word, and he began to think she was a very slow student. He finally discovered

to him; and the door to the Cafeteria presents a hazard for safe entrance unless Lowry remembers to duck. Lowry is working on his master's degree at Southern this summer.

(Egyptian Staff Photo)

ered what was wrong: she was scared stiff of him.

"But she got over it, and turned out to be a very intelligent student," he said.

The tall teacher says he was six-foot-ten when he graduated from grade school.

"And I went all through high school thinking I was six-foot-eight," he relates. "But when I got out, I decided to measure myself and found I was six-ten."

**Enjoys Teaching**

Lowry says he enjoys teaching school, especially the seventh and eighth grades which he is now teaching.

"I suppose the subjects I enjoy teaching the most are English and arithmetic," he remarks.

"And the subjects I hate to teach are history and geography, even though I majored in social studies here at Southern. I guess I had too much of them then."

"I thought my greatest weakness in teaching would be that I wouldn't like children, since I had never had any dealings with them," he said. "But I've never taught one I didn't like."

Lowry believes SIU is "a great university."

One of the strong points of the University is the number of good teachers in the education department," he declares.

The towering graduate student laughs as he recounts his one experience with the U. S. Army. "I was too tall for them," he says. "They drafted me, but all they did was measure me, and that was that."

## Home Economics House Opens In September

### Student Union Sponsors Free Movie Tonight

The week's Student Union sponsored activities get underway tonight in McAndrew Stadium with the movie "Adam's Rib." Tonight's free movie stars Spencer Tracy and Katherine Hepburn.

Friday, July 10, a record dance will be held in Anthony Hall parking lot. Refreshments will be served.

Monday, July 13, a Lemonade Hour will be held in the Student Union and at Thompson Point from 9:30 to 11 a. m.

### Funds For New Branch Authorized

A \$25,000,000 appropriation to establish an SIU branch at Edwardsville was authorized by the Illinois State Legislature last week.

In an amendment to a proposal to put a \$120,000,000 bond issue before the voters, the law-makers added \$75,000,000—one-third earmarked for the SIU project. The other part of the added amount is to go to the University of Illinois for the establishment of a branch at Chicago.

The legislature passed the amended bill, now raised from \$120,000,000 to \$195,000,000, in the House by 139 to 7. The Senate passed the measure by a vote of 37 to 12.

**Gets To Governor**

The bill will now go to Governor William Stratton for approval. Stratton proposed the original bill for the expansion of higher education. If approved, the whole amount will be put before the voters in the form of a bond issue next year.

Madison-St. Clair County residents are campaigning for \$15,000,000 in donations to purchase a 2,500 acre site for the school, southwest of Edwardsville.

More than \$600,000 has been contributed by residents of the two counties. Sixty thousand people have contributed, and some large contributions have been received from industrial and labor organizations.

**Recent Funds**

Recent gifts include: Owens-Illinois Glass Company, \$25,000; Olin-Matheson Chemical Corporation, \$30,000; Granite City Steel, \$6,000; Alton Box Board Company, \$6,000; Dow Chemical Company, \$1,000; and Aluminum Company of America, \$1,000.

Labor organizations of the two counties have contributed more than \$115,000.

A loan agreement by 14 banks in the counties is making available an additional \$500,000 to ward purchase of the site.

### Provides Efficient Labs And Classroom Space

By Mickey Sparks

After two years of construction, the new Home Economics Building on Grand Avenue will be ready for partial occupancy during the fall term of 1959.

Over two million dollars have been spent thus far on the building. A bill granting an additional \$1 million for its completion has passed the Illinois State Legislature, and is awaiting Governor William G. Stratton's approval.

The three-section structure, located between University and B. Illinois Avenue, will house home economics classrooms, general classrooms, laboratories, and offices.

Child development laboratories, a home management house, general classrooms, one clothing lab, two foods labs, locker space for food and nutrition classes, a family living lab, and facilities for the home economics education department will be ready for use this fall.

**Will Be Air Conditioned**

The building, newest on Southern's campus, will be entirely air-conditioned and equipped with fluorescent lighting. A small lecture-demonstration hall, east of the four-story wing, is being wired for television productions, both live and filmed. Two elevators, one for passengers and

### SIU Senior, Train Victim Doing Nicely

A Holden Hospital spokesman said Monday that Jerry Herwick, SIU senior who was seriously injured last Thursday when the car he was driving was hit by the Illinois Central freight train at the Grand Ave. crossing, is "doing nicely."

Herwick received head and chest injuries in the crash, including fractured ribs and a punctured lung. Hospital authorities reported him in fair condition Thursday afternoon.

The accident occurred about 11:30 a.m. Herwick was driving east on Grand Ave. and drove onto the track in front of the slowing freight.

The engineer said he had just whistled three times for the crossing. He said the bell was ringing on the engine, and the headlight was on the track in front of the slowing freight.

The train hit the 1959 Ford broadside and carried it about 200 yards down the tracks before stopping. The train was heading north.

**Two Killed**

Two people have been killed at the Grand Ave. crossing in recent years, and a number have been injured.

Dr. Henry L. Wilson, associate professor of English at SIU, was killed on May 7, 1958, when his car was hit by a north-bound Illinois Central freight, and Charles W. Mueller, Jr., a M. Carmel student, died January 18, 1955, in a similar accident.

In March, 1958, the SIU Board of Trustees asked that signals and gates be put up at the crossing.

In petitioning the Illinois Commerce Commission, the Board stated that "dangerous conditions are created at rush hours, at times when visibility is poor, and at times when driving conditions are less than ideal."

After the death of Wilson, SIU students staged mass protests urging that action be taken to prevent further death at the crossings. Mock graves with crosses were made beside the crossings, and students from an SIU government class met on the tracks in protest.

The most recent ICC ruling on the crossing ordered the Illinois Central to install warning signals and crossing gates by Jan. 1, 1960. Work was begun on the project June 1, but little progress has been made so far.

one for freight, are being installed.

A home management house, nicknamed the "Penue," by SIU students, will be on the roof of the four-story wing, and a second house, separate from the main building, is in the plan. Students will live in the home management house for six-week periods, and experience the actual application of theory and budgeting taught in the classroom.

Specialized laboratories, classrooms, and research areas will be housed in the four-story wing. The first floor will be devoted to equipment labs for teaching and research, as well as the search rooms for the clothing and textiles department. Equipment staff offices will also be located on this floor.

The second floor of this wing will include a food demonstration lab, classrooms, and a meal-planning laboratory.

**Food And Nutrition**

The department of food and nutrition will occupy the third floor. Located on this floor will be laboratories for undergraduate and graduate classes, a storage room, offices, and rooms for foods and human nutrition, and student and faculty locker rooms.

The department of clothing and textiles will utilize the fourth floor, included in its facilities are labs for beginning clothing construction, advanced clothing construction, home furnishings, apparel design, and an out-of-classroom. Clothing and textile staff offices will also be on this floor.

The availability of "efficient labs and classroom space plus a good program" will automatically draw more students, Dr. Eileen Quigley, dean of the home economics school said in an interview last week.

**Will Give Equal Opportunity**

Facilities that will give equal opportunity to our students as compared with those of other universities," Dean Quigley said.

The school, which has been located in Old Main since 1909, has been hindered by inadequate facilities such as equipment laboratories.

Home economics came to Southern in 1909. Grace Jones was the only instructor for the first two years. The first degree students graduated in 1937.

The School of Home Economics, which is composed of the departments of clothing and textiles, food and nutrition, home and family, and home economics education, was established in July, 1957.

### Late Leaves For Movie

As a result of last Wednesday's conflict between University hours for women students and the length of the movie in Furr Auditorium, the Office of Student Affairs has extended the use of late leaves to cover the "length of time" after the performance is over, Mrs. Ott said.

According to Mrs. Loretta Ott, acting dean of women, notices will be sent out to University residences and off-campus housing, this week extending the use of the special late leaves to the length of time after the performance is over, Mrs. Ott said.

No specified time is mentioned on these late leaves, but the student is expected to return to the residence halls or off-campus housing "within a reasonable length of time" after the performance is over, Mrs. Ott said.

There was a sharp increase—31 per cent—in the number of college juniors enrolled as majors in 1958-59 compared with 1957-58.

### Concert Honors Member Injured In Accident

The first concert of the Southern Illinois Summer "Pop" Orchestra was given Tuesday evening, June 30, on the Woody Hall Patio. Candice Elchering in wine bottles sold checkered tables and a star-lit summer sky transformed the patio into a magical outdoor cafe.

The concerts, directed by Carmen Ficoelli, are patterned after those given by the nationally famous Boston "Pop" Orchestra. Light-hearted popular songs such as Leroy Anderson's "Plink, Plunk, Plunk" create an informal atmosphere. The "True to Our Flag March" by George Ellwood was selected as the opening number for Tuesday's concert as a tribute to the approaching Fourth of July holiday.

The entire program was dedicated to member of the orchestra, Mrs. Edith Krappe, who is in the hospital recovering from injuries suffered in an automobile accident, which caused the deaths of an SIU instructor and a student.

Guest soloists are featured at the concerts. Jerrie Dean, an SIU student, was guest conductor at the first concert. The SIU Orchestra consists of faculty and students, both high school and college. Ficoelli is assisted by Concertmaster John Watson.

"The summer concerts are a new idea. They are being presented this year because this summer, so popular last summer," said

prize-winning drama, which will be opening tonight at 8 p.m. (daylight time) at the SIU Playhouse. The cast also includes Becky Burroughs and Cosmo Ingers. It is under the direction of Dr. Christian Moe.

(Photo By Val Biggers)

**"GLASS MENAGERIE"**

Jo Conrad, portraying Laura, and Jack Fitzgerald, in the role of The Gentleman Caller, seem intent on the glass figure which Laura holds. The scene is from "The Glass Menagerie," Tennessee Williams' prize-winning drama, which will be opening tonight at 8 p.m. (daylight time) at the SIU Playhouse. The cast also includes Becky Burroughs and Cosmo Ingers. It is under the direction of Dr. Christian Moe.

**THE RESULTS**

This crushed 1959 Ford is the result of another accident at the Grand Street railroad crossing. Jerry Herwick, driver of

the auto, was seriously injured last Thursday when the Illinois Central freight train derailed his car about 200 yards down the tracks. Herwick is the

fourth victim to be injured in similar accidents at the crossing. Two people have been killed there.

(Egyptian Staff Photo)

# The Editors' Opinions

## Peaceful And Innocent...

## ...And Then It Happened!

### The Grand Toll

Two dead... gone... never more to feel the breezes in their faces, hear the lilting songs of birds or see the fluffy clouds in azure skies. Four injured... bleeding... moaning in agony... with scars to carry for the rest of their lives, both physically and mentally. Families left in tragic sorrow. All the toll of the Grand Street Railroad crossing. But can we blame the railroad crossing... a mere bit of steel and wooden ties? Can we put the guilt on the steel, black and clanging engine of the train? NO, WE CANNOT.

In March, 1958, the Board of Trustees at SIU voted to ask for signals at the Grand Street crossing. They also asked for the closing of the crossing at Harwood.

The Illinois Commerce Commission ordered gates and flashing signals to be erected at the crossing in the summer, 1958.

The work was delayed by the city until an amended order to keep Walnut Street open for traffic would be passed. The deadline for the signals was then set for Jan. 1, 1960.

Railroad workmen began the installation in June of this

year. A further delay has been caused by the time necessary for control panel wiring. The danger of the crossing has been pointed out time and time again. The heavily traveled crossing has poor visibility from either side. The parking lot obscure the driver's sight until his car is practically on the tracks. The trains coming into Carbondale are traveling at a fast rate of speed... too fast to save a life... but fast enough to kill... speedily enough to injure.

Undoubtedly action is being taken at last to provide the signals for the crossing. The action is certainly welcomed. But it has once again come just a little late.

**SPEECH DEPARTMENT ADDS DOCTOR'S DEGREE**  
A doctorate program will be added to the speech department program next fall, according to Dr. Ralph Micken, chairman of the department.

Four doctorate candidates are enrolled in the program and four more committed to it, Micken explained. The Ph. D. program will be in rhetoric, public address, speech criticism and speech education.

# Voice Box

## Former Student Praises And Criticizes University

Dear Editor: I am a former SIU student, class of '45, and graduate alum, 1947-48, a "has-been" high school and elementary teacher, as well as newspaper man and church worker in years gone by. However, I am now a "has-been" "has-been" author, who still is enjoying reading each and every issue of the EGYPTIAN! All down through the years, whether my circumstances have been "for better, for worse, for richer, for poorer," I have continued to look forward to the EGYPTIAN with added enthusiasm believing that it improves all the time.

Particularly do I appreciate the good, common sense attitudes prevalent in the articles, which leads me to that which had finally prompted me to write my sentiments (sorry I have neglected doing so heretofore). The old adage, "give credit where credit is due," is so well carried out, both in plain-spoken manner, and "between the lines" in instances where an outspoken editorial, letter to editor, or staff article, whatever the case may be, would be incriminating or embarrassing.

**Wasn't Fair**  
For example (and don't you love that phrase?) It means we're finally to the point of this letter to the editor, in this instance, when I heard over the radio all about the 500 strong riot, started by Southern's disgraced strip-teaser giving SIU a bad name all over our nation. I thought the situation was overplayed and remembered Christ's words, "He that is without sin, let him cast the first stone." Too I thought the blame was unjustly distributed, and I still think so, especially since I read what I'm sure is a truer account of the incident in the EGYPTIAN. Why should the girl involved be dismissed from the University, while all the mob, who were doing worse, are allowed to go free? Even the leader, if I understood correctly (from another source other than the paper or radio) did not have to fulfill his week's jail sentence; I did not hear how the flogging turned out. I think... not that I suppose anyone values my opinion, especially, but I would appreciate the opportunity to voice a few of my personal thoughts on the matter, if you can see your way clear to use them where they may be heard.

I believe the SIU coed who is being dismissed for questionable, un-lad-like activity is being greatly discriminated against, unless she has done far worse than the impression I obtain of her waywardness. From the two articles I read in the EGYPTIAN, I think she deserves only the penalty equal to the one given the fellow who led the riot, and that all who participated in the riot, who can be identified, deserve equal lesser fines. Or, if the naughty little gal must be

dismissed, so should the naughty boy! I've had my say, now, whether or not anyone takes notice, I feel better.

**Great Leadership**  
There are a few other observations I'd like to make concerning the present-day management of my dear alma mater. I think it is wonderful the way Southern has gone forward and become so great in such a short time, and I know this would never have been possible had the leadership in this administration not have been the best. Likewise, I'm aware that it has greater advantages, we must pay greater prices... still, (there was no need to go further, was there; you knew I was coming to some form of however), it is necessary for tuition to just keep on skyrocketing? Then another matter... 52 students fined \$50, I read recently, and the second penalty for having cars on campus when one is only a freshman or sophomore is dismissal from school! Or did I just dream that I read that? I hope so. Back in my "College days" students were appreciated and treated like mature individuals, whether or not we were. (Not intending to get too personal, but perhaps that's why some of the members of my class got to graduate... could I get on my own toes, then).

**'Too Prachy'**  
Well, I'm not a preacher or a preacher's son, but I was "brung up" with a lot of preaching, and Dr. Schneider criticized my writing severely for its being "too prachy" (no offense, bless his heart; had it not have been for him and Dr. Harris, I'd have been kicked out of the English Dept. long before my degree was complete). But, as I was about to say here in closing to all whom it may concern; give me, if, in my criticism which has followed my words of praise, I may have echoed John the Revelator a bit, in his second chapter of our last New Testament book, where he lavishes praise upon the church. I want to see Southern great and greater; yes, but not greater if it means losing sight of her first love, which I think should be to keep higher education within the reach of fun-loving lads and lassies who must work their way up the Ladder of Knowledge.

James W. Fuller  
(EDITOR'S NOTE) The bugle-blower's fine was also suspended.

Martha Bankson, sophomore, received a \$150 scholarship from the residents of Woody Hall this year.

Thirty advance Air Force ROTC cadets at Southern have joined summer training units at four Air Force bases this summer.

# LITTLE MAN ON CAMPUS

I'M GIVING THEM THEIR FINAL EXAMINATION ON THE FRENCH REVOLUTION.

## Great Americans

### Their Duty To Create Our Freedoms; Our Duty To Protect And Continue

Intelligent... and dynamic leadership has always been the key to preserving our freedoms. As one international crisis follows another, it becomes more and more apparent... leadership makes the difference.

These precious freedoms were created by dynamic leaders. When George Washington took his oath of office less than 200 years ago... the world suddenly changed.

For the first time, a whole people became their own boss; our new nation became the first to enjoy democratic government.

Those latter years of the eighteenth century were trying for our first Chief Executive. He was a big, sturdy man... but no longer a young man, and tired by six hard years of war. Petitioners asked him to be king, but he refused.

This great man had visions... but not of grandeur. His dream was for freedom.

So it was for his fellow patriots... men like Paul Revere, John Hancock and John Paul Jones.

**Apollis Riviere**  
Revere's father came to America from France... his name then was Apollis Riviere. A lad of 13, he was apprenticed to a blacksmith. When friends had difficulty pronouncing his name, he changed it to the one which since has gained immortality.

His third son... named for him... grew up to be a skilled artisan and outdoorsman. Broad-shouldered and strong, his pet diversions were to ride, skate and shoot. After serving as a lieutenant in the war between France and England, he became avidly interested in copper engraving.

He was America's first cartoonist, initiating our strong campaign against Britain's colonial Stamp Act. Later, his best-known work stirred the hearts of patriots throughout the 13 states... a vivid depiction of the Boston Tea Party as a member of the Sons of Liberty. When this group heard that a British frigate was moving to Concord to seize military stores, Revere embarked on the famous ride, warning the countryside that "The British are coming."

Revere gained his greatest fame for but one of his heroic acts... his great ride which overshadowed all his many other accomplishments. John Hancock, best known for his bold signature on the Declaration of Independence, also contributed very much more to the cause of freedom.

**No A Tary**  
One of the wealthiest and most influential citizens of colonial Boston, Hancock could have easily been a proper Tory living in sumptuous life.

He chose instead to identify himself with the cause of Liberty, to risk his fortune... in the cause of American Independence.

Hancock persistently used his influence against the Stamp Act... and when it was eventually repealed, touched off a great celebration for his neighbors in open defiance to the British ruling body.

But the British demanded further revenues; taxed glass, paper and tea among other things; to make up the lost revenue. Precure mounted... on June 10, dinner will be held at the Elks Club in Carbondale on July 23 at 6:30 p.m.

**Aids Surrender**  
Inuit is credited with hastening the Japanese surrender in World War II. In an English broadcast in July, 1945, he told the heads of the Allied Powers that the Japanese people were ready to be ruled by the provisions in the Atlantic Charter. Inuit is a graduate of the University of Michigan.

Other outstanding speakers will be Constantine N. Kangelis of Chicago, Fidel Castro's American Legal representative, Generalissimo Francisco Franco of Missouri-Resources and Development Commission; Dr. C. C. Lively of the University of Missouri; and Malcolm Drummond, St. Louis special planning. These men along with University faculty members will participate in the discussions.

**THE EGYPTIAN**  
Publisher: The Egyptian was founded in 1927 as a campus newspaper and has since grown to become the largest and most influential publication in the area. It is published weekly except on holidays and is owned by the students of Southern Illinois University, Carbondale. It is published by the Student Body and is not for profit. The office is located in the Student Union Building, Room 101, Carbondale, Illinois. The office hours are from 8:00 a.m. to 5:00 p.m. daily.

# Gus Bode Says

Gus wonders why they call it "sothell" cause he got hit in a game the other day and the ball sure didn't feel soot!

Gus is beginning to wonder if the weather at the Center site will believe that China is down below.

Gus has heard rumors that some older teachers are on campus for further study, but he didn't pay much attention until he met his first grade teacher the other day going to a tennis class.

Gus sees the Grand Street crossing score is 2 down, 4 walked, and uneven innings to go.

Gus sees summer is here when he pays more attention to keeping the sweat off his inked nose than the sweet little gal sitting next to him in class.

# News And Views

**By Barbara Dwyer**  
In recent years the question of "college education" has become a "spot-lighted" aspect in the American way of life. And in "American" spotlight has been the question of the substantial progress of higher education in regard to the scientific training of students and the salaries of college instructors.

Two reports just published by the Office of Education reveal substantial progress in these two important areas in higher education during the past year.

There was a sharp increase... 30 per cent... in the number of college juniors enrolled as majors in mathematics in 1958-59 as compared with 1957-58. This compares with an increase in total college enrollment of 6.2 per cent and an increase in junior-year enrollment of 3.8 per cent.

**Closed Doors**  
Not only does this large increase in junior-year enrollment in mathematics mean? It seems that it is a clear indication that more and more students are coming to realize that without a solid foundation in this field of study, the doors to many careers in the technological age will be closed to them.

Another significant advance in higher education during the past year has been the rate of the number of junior-year students enrolling as majors in science and mathematics. This number rose from 50,513 to 55,777, or 10.4 per cent over last year. There has been, however, much slower progress in the biological and physical sciences.

**Double Salaries**  
And now we turn to the matter of how much "bacon" does the teacher take home. The average salaries of full professors in four-year private colleges and universities increased 15.6 per cent in 1958-59 over the previous year. This rate of increase would more than double the salaries of full professors in these institutions in five years.

The 15.6 increase in average salaries paid full professors in four-year private colleges and universities boosted these salaries from an average of \$7,360 to \$8,510. While this new average is far from what it should be, in view of the heavy investment of time and money that goes into the attainment of the professional rank, it is an important advance.

Why is this salary increase an important advance in the modern-day educational process? This improvement is indicative of a growing trend to compensate the men and women who are in key positions of the country's progress.

**Encouraging**  
While this new-found "glory" will not put food in the teacher's mouth or buy junior's shoes, it will encourage our present teachers and those who want to enter the profession.

For all ranks combined, faculty salaries at four-year private college and universities went up 11.4 per cent this year... an annual rate that would more than double salaries in seven years.

The comparable increase in salaries in public institutions is higher than in private institutions. Also another factor for realization is that: most State legislatures did not meet in 1958.

## Editors Meet For Talks And Awards

Twenty-five weekly newspaper editors from the United States and Canada have been invited to attend the first International Conference for Weekly Newspapers. Editors which will be held July 19-24 at Giant City State Park.

Although conferences have been held in previous years, this is the first year that participants have been invited from Canada. One of the high-lights of this five day conference will be the announcement of the winner of the Elijah Parish Lovejoy Award for Courage in Journalism. The winner of this award is selected for outstanding editorial service during the year 1958.

**Five Nominees**  
The nominees for the award this year are: William R. Dunn, Aspen, Ariz.; Aspen Times, Aspen, Colorado; William Jones, Franklin Press, Franklin, North Carolina; John Wells, Arkansas Recorder, Little Rock, Arkansas; Earl E. Neiberg, Putnam County Herald, Cookeville, Tennessee; and Milton K. Fried, Delaware Coast Press, Rehoboth, Delaware.

The recipient of the 1958 award was J. Wilcox Dunn, Princess Anne Free Press, Virginia Beach, Virginia.

To speak at the dinner-meeting which will be open to the public, will be Kiyosue Inui, a retired Japanese diplomat. This

# West Coast Firms Seem Interested

Seven West Coast manufacturers contacted by a three-man industrial team from Southern Illinois recently are "definitely interested" in establishing branch plants in this area.

The firms are engaged in a variety of manufacturing enterprises, from industrial finishes and varnishes to launching pads for guided missiles, according to Robert S. Henderson, industrial consultant with SIU's department of community development.

Henderson called on the seven manufacturers by pre-arranged appointment, accompanied by H. Mason Parker, industrial engineer for Central Illinois Public Service Co., and William C. Westberg, SIU professor of industrial psychology.

## Bright Prospect

One of the brightest prospects for expansion into this area, Henderson reported, is a company planning to build a 325,000 square foot plant in the Midwest. He said all seven firms were interested in the Midwest because it would give them a more centralized location to their markets and raw materials. Southern Illinois was being given favorable notice because of the state's tax climate and the reserves of available labor here, Henderson said.

The industrial team had follow-up interviews with two San Francisco companies which were contacted by a group of Southern Illinois businessmen on a West Coast visit last December. The other five companies are based in the Los Angeles area.

Henderson said company executives were particularly impressed by the team effort being exerted for statewide industrial development by the University, a private utility, and a score of towns and counties working through SIU's department of community development. Henderson and Parker presented technical information on area resources and factory sites while Westberg discussed the area labor market and employee testing and training services of the University.

# Softball Begins Today

The Intramural softball program begins today when the Josephines meet the Overseers and the Green Thumbs battle the Sigma Tau team.

The Chautauque Vets will meet Fels, Floor 1, on Thursday, July 9.

Monday, July 13, will find the Sigma Tau team staged against the Overseers. Fels Hall, Floor 1, will meet the Josephines the same day.

The Green Thumbs and the Chautauque Vets will play on Tuesday, July 14.

The Overseers will play the Green Thumbs on Wednesday, July 15. Wednesday will also be the day the Sigma Tau and Fels Hall, Floor 1, meet.

Thursday, July 16, will be the battle between the Chautauque Vets and the Josephines.

## COOL AND SERENE

Mother Nature poses a lovely, tranquil scene in this view of the Thompson Point Lake. The wide, branched trees offer peaceful shade for students who want to "get away" and

study or just meditate on the wonders of being alive. The various animals, birds, insects and plants offer on-the-spot study for students in zoology and botany classes. No decision has yet been reached on the date for the opening of the lake for swimming, even though the calm water looks inviting. The date for allowed swimming will be set by

President Morris. The delay is due to the lack of water in the lake. When the waters do rise enough the swimming area will be opened. There is a possibility that the beach will not be open at this

summer if there is not an adequate amount of rainfall. But the beauty of the lake area can be enjoyed, even if there are no swimmers to disturb the sleep and freedom of the lake residents.

# Grad Students Receive On-Job Training

This summer, 14 graduate students in SIU's rehabilitation counseling program will receive on-the-job training in seven locations.

The students will be working with professional rehabilitation staffs. As interns, they will be paid both in cash and SIU credit while learning the practical side of rehabilitation work.

After completing their internship, most of the students will return to SIU to continue work on their master's degrees. The summer work sessions are arranged by SIU's Rehabilitation Institute.

Robert Patterson, Duluth, Minn., will help complete a follow-up study on mental health in Minnesota. The survey is part of a state and federal mental health program.

Two of the students will intern at the Jewish Vocational Service in Chicago. They are Gaylord Rybick, Chester and David Hyson, Menasha, Wis. Robert Edwards, Carbondale, will spend his summer at the Harlingen Tuberculosis Sanatorium in Harlingen, Texas.

Richard Ballsmith, Elgin, will work with the staff of the Hinsdale Tuberculosis Sanatorium in Hinsdale, Ill. Jim Forness, De Soto, Ill., will be a director of SIU's Little Grass Camp program for the handicapped.

Seven of the students will intern at the Anna State Hospital. They are John McCurtis, East St. Louis; Barbara Rohdman, Virginia Furlong, Ron Hutchinson, and John Robert Teague of Carbondale; William Sampson, Florissant, Mo., and Frank Gittins, East Alton.

Met Verhagman, Herrin, will work on the staff at Menard Penitentiary.

# Keeper Attends Annual Institute On Freedom

The trend toward a strong central government is endangering the federation-state type of government.

This was the conclusion reached by the speakers at the sixth annual Institute on Freedom and Competitive Enterprise held at Claremont (Calif.) Men's College June 14-27.

Dr. Wendell E. Keeper, dean of the SIU School of Agriculture who attended said the theme of the meeting was an examination of trends in government as they affected individual freedom.

Speakers for the meeting included Dr. John Jewkes, outstanding economist from Oxford University; Armen Alchian, economist at the University of Los Angeles; and Dr. Felix Morely, one-time president of Haverford College and editor of the Washington Post during the Roosevelt administration.

"As far as I'm concerned, it was the most stimulating two weeks I've ever spent," said Keeper. He received one of 27 all-expense fellowships issued by the Volker Foundation of Burlingame, Calif.

The fellowships were granted to those attending the Institute on the basis of their disciplines in training, geographic area and the type of institution they represented.

Leaders in the fields of economy, political science, business administration, law, philosophy, anthropology, engineering and history were present at the seminar discussion type meeting.

One of the highlights of the trip for Keeper was a visit to the University of California Citrus Experiment Station at Riverside, Calif.

# Alumni Office Gets Citation

The SIU Alumni Office received an honorable mention citation at the week-long annual conference of American Alumni Council which closed Thursday at Mackinac Island, Michigan. The award to Southern's office came in the special events category for direct mail promotion of alumni association activities.

# Study Shows

## Static Electricity Found In Cigarette Smoke

Cigarette smoke is charged with static electricity.

This is one of the findings of recent tests conducted by chairman Charles J. Brasfield of the SIU physics department.

Brasfield found that gases exhausted from cigarette smoke, having a high carbon content, pick up electrons from the tobacco as they pass through. Experiments with an electrometer showed the smoke to be charged. The electrometer gave negative readings when used to test the smoke.

Brasfield said the experiments gave no indication that the space charge in the cigarette smoke is a factor in lung cancer.

## Exhaust Charged

Motor exhaust is also charged, the physics experiments show. The exhaust gases pick up electrons from the tailpipe of the auto just as the cigarette smoke does from the tobacco. In each case, the gases are loaded with carbon, and it is the carbon that picks up the electrons.

Because of this clearing of the static electricity by the gases, drivers can clear the electricity from their vehicles by gunning the motor at full choke, Brasfield says.

Truck drivers whose vehicles haul loads of highly inflammable or explosive material use drag

# Student Union Plans Parties And Trips

Bridge parties, picnics, free dancers, a trip to St. Louis, and other events for summer fun are being planned and sponsored by the Student Union.

The second bridge party for the summer will be held at 2 p. m. on July 17 in the game room at Lentz Hall, Thompson Point. Anyone who enjoys playing bridge is invited.

The coffee hour which is being held for the wives of men attending the National Science Foundation have been changed from 9:30 a. m. to 10 a. m. Guest speakers will discuss hair styling, fashions, child care, and other items of interest to women.

A trip to the St. Louis Municipal Opera, where the musical comedy "Gentlemen Prefer Blondes" will be showing, is planned for July 18th. The limit for this trip is 40 persons, so sign up early at either the Thompson Point service desk in Lentz, or at the Student Union.

A free record dance, stag or drag, will be held on Anthony Hall parking lot July 10th. Free refreshments will also be served. The Thompson Point Street Dance has been changed to July 24.

Parking facilities are available at the new location for delivering and picking up material. The phone numbers for the Service are still 4961 and 4971.

# Steno Service Recently Moves

Stenographic Service is now located at 816 South University, north of Woody Hall.

The move was made from the Parkinson Building to the new location on July 2.

Parking facilities are available at the new location for delivering and picking up material. The phone numbers for the Service are still 4961 and 4971.

# WSRV-FM Student-Operated Station Announces Radio Schedule

WSRV-FM, Southern's student-operated radio station, has announced its schedule for the summer session. The station will broadcast from 5 p. m. to midnight Monday through Friday, and noon to midnight Saturday and Sunday.

The schedule is as follows:

## MONDAY:

5 p. m., Bandstand 91.  
6 p. m., Music in the Air.  
7 p. m., Summer in Southern Illinois.  
8 p. m., Concert Hall.  
9 p. m. to midnight, Music Box.

## TUESDAY:

5 p. m., Bandstand 91.  
6 p. m., Music in the Air.  
7 p. m., Summer in Southern Illinois.  
8 p. m., Concert Hall.  
9 p. m. to midnight, Music Box.

## WEDNESDAY:

5 p. m., Bandstand 91.  
6 p. m., Music in the Air.  
7 p. m., Summer in Southern Illinois.  
8 p. m., Concert Hall.  
9 p. m. to midnight, Music Box.

## THURSDAY:

5 p. m., Bandstand 91.  
6 p. m., Music in the Air.  
7 p. m., Summer in Southern Illinois.  
8 p. m., Concert Hall.  
9 p. m. to midnight, Music Box.

## FRIDAY:

5 p. m., Bandstand 91.  
6 p. m., Music in the Air.  
7 p. m., Summer in Southern Illinois.  
8 p. m., Concert Hall.  
9 p. m., Dimensions in Jazz.  
10 p. m. to midnight, Music Box.

## SATURDAY:

12 noon, Guest Star.  
12:15 p. m., RFD III.  
12:30 p. m., To the Ladies.  
12:45 p. m., Almanac.  
1 p. m., The Best in Opera.  
3 p. m., Saturday Session.  
6 p. m., London Forum.  
6:30 p. m., Manhattan Melodies.

## SUNDAY:

12 noon, Melody Fair.  
4 p. m., Here's to Vets.  
4:15 p. m., Dateline London.  
4:30 p. m., Search for Paradise.  
5 p. m., 60 Minute Theatre.  
6 p. m., Music in the Air.  
7 p. m., 30 Minute Theatre.  
7:30 p. m., Paris Star Time.  
8 p. m., Concert Hall.  
10 p. m. to midnight, Treasure Music.

# High School Workshop Set

Approximately 45 high school sophomores and juniors are attending the 3rd summer vacation Communications Workshop at SIU July 5 to August 1. The workshop is divided into three areas: journalism, drama, and speech.

The main purpose of the workshop is to acquaint high school students with the field of communications. The program is also designed to help students improve their school activities in discussion, debate, dramatics and school publications.

Students may major in one field and minor in another.

The journalism workshop, directed by assistant professor Don Smith of the journalism department, is being conducted in the journalism barracks. Students enrolled in the program will work on the EGYPTIAN and the Obelisk, and will also put their own weekly newspaper.

Dr. Walter Murrish is directing the speech workshop in Barlicks 1. Speech workshop students are studying voice, oratory, after-dinner speaking, impromptu speaking, extemporaneous speaking, and intra-squad debating.

The drama workshop is headed by Dr. Charles Zoelcher and is being conducted in the industrial arts wing of University School. Students in the drama workshop work in voice, action, scenery, set, costumes, publicity, and direction, and will produce a three act play, which will run for two performances.

Recreation for the students includes horseback riding, swimming at Little Creek, a trip to the Municipal Opera at St. Louis, patio parties, and a picnic at Giant City State Park.

# Workshop In Gardening

A three-hour workshop with credit in gardening and landscaping will begin on August 17 and continue through August 28.

The workshop which is being offered to improve the attractiveness and appearance of Southern Illinois, is under the instruction of Dr. L. R. Tucker.

CARBONDALE, ILL.

**SPACE CHARGE**

Robert Giggs blows cigarette smoke into a Parady cage testing smoke's electrical "space charge." Electrometers need require full negative charge as smoke hits atmosphere inside cage. Phenomenon — similar to static electricity produced by combing hair — is caused by carbon particles in smoke "sweeping" electrons off tobacco particles. (Information Service Photo)

# Swimmers Hit Trail For Championships

The National AAU Outdoor Championships are next on the list for SIU's top swimming swimmers tomorrow. Best Rumpel and Wink Rodgers.

Rumpel and Rodgers will represent the Salukis against some of the nation's best swimmers gathered at the Fremont Hills Country Club in Los Altos Hills, Calif., on July 10-12.

Rumpel, owner of four American breaststroke records, will defend his 200-meter breaststroke title at the meet. Last year at the Outdoor he covered the distance in 2:47.8.

In addition to the 200-meter mark, Rumpel also holds the short course (pool 25 yards and longer) record for the 220-yard breaststroke in 2:36.1; the 100-yard long course (50 meters and over) record of 1:08.0; and the 200-yard long course of 2:33.8. The latter two records were established June 19-20 at the Peach Meet in La Grange, Ga.

In Georgia, Rodgers set a new Peach Meet record in the 200-yard individual medley with a time of 2:19.2. He also tied for first in the 100-yard butterfly in 59.3.

Rumpel and Rodgers paced the Salukis to their first Interstate Conference swimming title last winter, defeating nearest rival Western Illinois, 156 - 68. Southern coach Ralph Casey will accompany his entries to the national meet.

# Clinic Set For Coaches

Two of the nation's top coaches will be the speakers in SIU's Eleventh Annual Fall Coaching Clinic to be held in the University School Auditorium August 26 and 27.

Frank McGuire, head basketball coach at North Carolina, and Cliff Speegle, head football coach at Oklahoma State, will be the featured guests.

McGuire will speak on "Offensive Basketball," "Defensive Basketball," and "General Duties of a Coach." Speegle will also give three lectures: "Defensive Football at Oklahoma State University," "Offensive Football," and "Football Preparation."

Carmen Piccone, head football coach at SIU, will also speak in the clinic. Piccone will talk on "Football at SIU."

In addition to the lectures, movies of Oklahoma State football games and North Carolina basketball games will be shown.

Other highlights of the annual meeting will be a hole-in-one tournament and a chicken dinner at the Jackson County Country Club.

Dr. Andrew Vaughan, director of the Clinic, is expecting an increase in attendance over last year's \$50. Vaughan said the clinic had been very attractive in the past to SIU graduates and near-by high school coaches.

A final feature of the coaches' meet will be 20 exhibits sponsored by various sporting goods stores and manufacturers.

**Casts Less... Does More**

**New Verifax Bantam Copier \$99.50**

Kodak breaks through the price barrier with a Verifax Copier for less than \$100! Now you can afford to have as many Bantam Copiers as you need... put one in every department—even the "one-man" office can save its cost the first month.

The Bantam makes 5 dry, accurate copies of any original—typed, printed, or drawn—in 1 minute for only 2¢ a copy. Pen, pencil, crayon writing, even those purplish spirit duplicator copies are reproduced as easily as typed data.

Stop in for a free demonstration. Only takes a minute or two to see the Bantam Copier in action.

**BRUNNER OFFICE SUPPLY**  
321 South Illinois CARBONDALE, ILLINOIS

**YEAH MAN!**  
Albert Schilt and Dan Konkko seem to be enjoying the atmosphere and the music at the pop concert last Tuesday night. The concerts are presented every Tuesday evening on the Woody Hall in La Grange, Ga.

# Heat And Water Service Shut Off For Inspection

With the daytime temperatures in the 90-100 degree range, steam heating and hot water service to the campus will be shut off August 15 to September 1 for annual inspection and repair of steam lines and boilers, according to Physical Plant Director William Howe.

Howe said the shutdown is necessary to allow repacking of the steam line connections in the two lines serving the main campus area.

"While the boilers are off for

Patio. Last week's concert was in honor of Mrs. Edith Krapp, English instructor who was injured in an automobile accident. Mrs. Krapp is a member of the University Orchestra which presents the concerts.

this work, they are also cleaned and inspected for the fall and winter heating seasons," Howe said.

Concerning the expanding demands for steam heat by the growing size of the campus, the director said that with the addition of the new University Center in the future, an additional boiler has been proposed. He said the new boiler would generate 66,000 pounds of steam per hour.

Southern encourages a broad student activity program with opportunities for all students to participate.

**GRACIOUS LADY**  
Becky Burroughs looks very much like a well-composed young woman in this scene from the Tennessee Williams' play "The Glass Menagerie." Her attention is directed toward Cosmo Insetta, who plays Tom. Miss Burroughs portrays the character of Amanda Wingfield. Both dramatists have appeared in several other plays on campus during previous seasons.

portrays the character of Amanda Wingfield. Both dramatists have appeared in several other plays on campus during previous seasons.

# Newsman Visit So. Ill. Area; Hear Lectures

Five newsmen from Latin American are visiting SIU and the southern Illinois area this week as part of an exchange program sponsored by the U. S. State Department.

The group arrived by bus from St. Louis Monday, then went to Giant City State Park where they met with Richard Poston of SIU's community Development Center.

Yesterday, the visitors toured the Little Grassy camping area, then attended a luncheon in Marion. Host at the luncheon was Oldham Patey, editor of the Marion Daily Republican.

Later the same afternoon, the newsmen met with the Chamber of Commerce in Herrin to acquaint themselves with the functions of local civic groups.

Dr. Howard R. Long, chairman of the SIU Journalism Department, and professors Donald Hillman and Charles C. Clayton gave informal lectures to the group Monday and Tuesday evenings. The lectures concerned various phases of American journalism and its part in the American life.

The visitors are scheduled to leave Southern today. After a stop-over in Sparta, where editor How Morgan of the Sparta Plaiddealer will be their host, the group will go on to St. Louis and catch a plane for Pittsburgh.

Members of the visiting group are Juan Espana, Buenos Aires, Argentina; Emilio Murano, Concepcion, Chile; Dr. Humberto Medrano, Havana, Cuba; Rosalio Colorado, San Salvador, El Salvador; and Rafael Nasta, Asuncion, Paraguay.

# Civil Service Announces Examinations

The United States Civil Service Commission has announced that applications are being accepted for examinations for filling the following positions:

Patent Adviser, \$5,430 to \$8,810 a year; Patent Examiner, \$4,490 to \$12,770 a year, and Design Patent Examiner, \$4,040 and \$4,980 a year, all for employment in various Federal agencies in the Washington, D. C., area. Most of the Patent Adviser positions are for duty with the Department of the Navy in its research and development programs. Most Patent Examiner and Design Patent Examiner positions are for duty with the U. S. Patent Office of the Department of Commerce.

No written test is required. To qualify, applicants must have completed appropriate college study or have had professional experience pertinent to the position for which they may apply. For Patent Adviser and Patent Examiner, the college study must have been in engineering or in an applied physical science. For Design Patent Examiner, in industrial design, architecture or product design.

Full information concerning the requirements to be met for these positions and instructions

# Piccone Needs Backfielders

Due to the loss of three All Conference backs SIU football coach Carmen Piccone is concentrating this summer on the recruiting of big, fast backfield men.

The three All Conference backfield men who were lost by graduation are Bill Norwood, quarterback, Cecil Hart, fullback, and Garver Shannon, halfback, who was a draft choice of the Los Angeles Rams. Returning backs from last year are Jan Janice, Ronnie Miller, Tom Bouns, Dick Harrington, and Amos Bullocks. In addition, there are two returning quarterbacks, Ronnie Winters and Duke Sutton.

Piccone said there are five or six top Freshmen backs planning to come to SIU.

"Because we are going to have to depend on Freshman backs, we are going to have to rely heavily on our experienced line," stated Piccone. The coaches were impressed with the line play during Coach Piccone said they have recruited about six linemen in an attempt to replace the two linemen lost through graduation.

One of the most promising recruits is end Jim Bartles, who has played four years of Navy football.

"As far as the recruiting goes," Piccone said, "I would like to get most of my players from this area." However, he has just returned from Massachusetts where he scouted prospects. A yet there have been no definite results from this trip.

Taking over coaching duties next year, besides newly hired head coach Piccone, are Harry Slay, backfield coach, and Ed Vance, end coach; and Bob Frazee, line coach.

# Attends Library Assn. Conclave In Washington

Seven members of the library staff recently attended the American Library Association convention in Washington, D. C. The convention was held in the hotel.

The library staff attending were: Ralph E. McCoy, director of libraries; Elizabeth O. Stone, assistant director for public services; Ferris Randall, assistant director for technical services; Kent Moore, chief, catalog division; John McCord, chief order division; Harry Skallerup, science librarian; and Gisela Heilperin, catalog department.

McCord also represented the library at the 4th Seminar on the Acquisition of Latin American Library Materials, Ward M. Morton, government department and A. W. Bork of Southern's Latin American Institute also attended this meeting.

for applying are given in the examination announcement for each. Announcements and application forms may be obtained from many post offices throughout the country or from the U. S. Civil Service Commission, Washington 25, D. C. Applications for these positions will be accepted until further notice.

**UMMM GOOD!**  
This fall Southern lads nuzzle into a cool, luscious piece of watermelon at the Student Watermelon Party last Thursday afternoon. Several students took advantage of the party to take a break from the warm classroom schedules and socialize. The Student Union has various other activities planned for the summer session.

partly to take a break from the warm classroom schedules and socialize. The Student Union has various other activities planned for the summer session.

# Professionals Study New Rehab Method

Fifty "professional students" are studying the newest development in the modern science of treating the handicapped at SIU.

The two-week seminar is supported by the U. S. Office of Vocational Rehabilitation and seven other Illinois agencies whose employees deal with the handicapped. Enrollment in the Sixth Annual Institute for Rehabilitation Personnel, one of the Midwest's leading workshops in the field, is composed of representatives of state agencies, hospitals and clinical centers throughout Illinois.

Top authorities in all phases of the rehabilitation process serve as lecturers to the participants of the Institute.

# Fulbright Grant Goes To Bork

Dr. Albert Bork, director of SIU's Latin American Institute, has been awarded a Fulbright grant to lecture in Peru this fall. Bork will teach personal administration and industrial relations at the University of San Marcos in Lima.

A doctoral degree graduate of the National University of Mexico, Bork taught there as well as the State College of Washington, the University of Arizona and Mexico City College before coming to Southern last year. He is professor of Spanish as well as head of the Institute.

Bork and his family will leave about Aug. 1 and will return to Carbondale in December.

as lecturers to the participants of the Institute.

# Geiger Speaks On Dewey And Role Of Man

The role of rational man and his problems in society was the theme of a speech given by George Geiger last week. The talk, fourth in a series honoring John Dewey, the educator, stressed intelligence in choosing proper values as a key to answering daily problems.

Geiger defended some of Dewey's rational views from critics who follow the existentialist or pessimistic belief. That group, Geiger explained, believes that man by following definite purpose has created more harm than good. Geiger attacked this by saying that the only vulnerable point of a rational thinker occurs when he fails to try specific acts, but not in his failures in attempting them.

**Three Basic Issues**  
"Bringing morals into existence," Geiger said, "... that is now conspicuously lacking with much to the detriment of logical thinking."

He continued by stating that we may assume from Dewey's teachings that there are three problems: It is good to solve problems; it is not general problems but always specific problems with which we must deal; and in trying to solve them, don't aggravate them.

Geiger has taught at various schools, among them the University of Wisconsin and the University of Missouri. He has been at Antioch since 1937. He has written "Philosophy in the Social Order" and "John Dewey in Perspective."

# DuQuoin Fair Hosts Students

The Du Quoin State Fair will be the center of attraction for a group of SIU foreign students on Sept. 1.

The students will be guests of the fair as representatives of their native countries for the United Nations Day, designated by the officials.

Jimmy Durante will be the headliner for the Stagerama variety show for the SIU guests.
